

# Calendar of Events 2010

Event	Description	Expected N° of participants	Participant Profile
<b>EPIA Annual General Meeting (AGM) and 5th Workshop on Market Potential and Production Capacity</b> 18-19 March 2010 Rome, Italy	EPIA's AGM will be an opportunity to further evaluate and discuss the opportunities and challenges of the Association and PV Industry, including important topics such as EPIA's future development. The Workshop on Market Potential and Production Capacity will discuss the market trends for the upcoming 5 years, within our global roadmap to 2020.	200	MEMBERS ONLY !
<b>General Assembly of the EU PV Technology Platform</b> 18 June 2010 Toledo, Spain	Experts from the PV sector will set out the sector's vision for 2020 and beyond, including an analysis of PV's market share by that date and of the R & D needed to keep costs on a steep downward track. The event will give a complete overview of the current situation of the PV sector, including EU and national policies, market development, an update on research and technology and also a review of PV in developing countries.	400	PV Industry, researchers, policy makers, EU and national institutional representatives and related stakeholders
<b>25th European Photovoltaic Solar Energy Conference and Exhibition (EU PVSEC) including the 7th PV Industry Forum</b> 6-10 September 2010 Valencia, Spain	The 25th European Photovoltaic Solar Energy Conference and Exhibition is organised by WIP in close institutional cooperation with EPIA. It will be held at the Feria de Valencia, Spain. The "who's who" of the PV Solar branch will meet to discuss the latest developments in science and industry.	1000 (to the 7 <sup>th</sup> PV Industry Forum)	PV Industry, researchers, policy makers, EU and national institutional representatives and related stakeholders
<b>3rd EPIA International Thin Film Conference</b> 9 November 2010 Munich, Germany	Presents the state-of-the-art PV Thin Film sector and offers an excellent opportunity to network with Thin Film's most knowledgeable experts. High-level speakers will analyse the current economic context and the future market and production scenarios for the Thin Film Industry. Furthermore, an analysis of future energy requirements of the PV Industry and environmental aspects of Thin Film production will be given by leading European Research centres.	300	Thin Film Industry, PV Industry, researchers, policy makers, EU and national institutional representatives and related stakeholders

## Willing to give full visibility to your company during our events?

EPIA conferences are key meeting places for the CEOs of PV companies, EU and national policy makers, analysts and investors to come together and discuss the future of our industry. Our events provide an excellent opportunity to widely promote your brand and expertise to the most relevant audience. The EPIA team is happy to help you choose the events and sponsorship option that is right for your company's communication strategy.
